TEN PAGES

OPEN BIDS ON TWO ROADS AND TRUCKS

Commissioners to Let Contracts Late
Today For Hillgoss and Miller
Highways in Walker

TEN BIDS ON MOTOR TRUCKS

Board Not Expected to Decide on
Selection Before Saturday—
Purdue Scholarships Awarded

The county board of commissioners opened bids for two motor trucks to be used in road maintenance work this morning, and this afternoon they received bids on two macadam roads in Walker township.

The roads for which contracts were to be awarded late today were the Fred Hillgoss and the Lorie Miller highways in Walker township.

Bids were submitted on ten three and one-half ton trucks at 10 o'clock this morning and the commissioners were closeted with representatives of the truck companies until noon. It was said that the award probably would not be made before Saturday so as to give the members of the board time to inspect the trucks.

The bids were lower than those submitted a few weeks ago when the board turned down all of them and readvertised. The commissioners are in the market for two trucks and some of the bids were for two and others only on one truck with the privilege of buying the second one at the same figure.

The bids were as follows: N. G. Bernstein, \$3,575 each; Hessel and Church (Noble truck) \$10,475.90 for two; O. Arm Leader Co., \$6,972.72 for two; F. O. B. Rushville; John A. Knecht, (U. S. truck) \$7,448 for two; Standard Motor Truck Co., \$7,000 for two; R. L. Tompkins (Stewart) \$4,170 each; General Motors Truck Co., \$10,000 for two; Mitchell Truck Co., (Parker) \$4,375 each; O'Brien Motor Co., \$4,800 each; Joe Clark (Federal) \$7,768 for two; Noble Truck Co., \$7,063 for two; Defiance Motor Truck Co., \$3,200 each; Simon Krebs Co. \$3,675 each; Indiana, \$7,364.52 for two.

The commissioners late Monday afternoon awarded two Purdue university scholarships for the school year beginning in September of this year and ending in June, 1923, to Ivan Alexander, son of Mr. and Mrs. Will Alexander, and Wallace E. Beer, son of Mr. and Mrs. Ed L. Beer. The scholarships are awarded annually in accordance with an Indiana law.

At the request of J. V. Young, Rushville township trustee, and Lew Lewis, Walker township trustee.

FOUR NEW SUITS ARE PLACED ON DOCKET

One Suit on a Note, Two Claims
and Petition to Sell Real Estate
Filed in Circuit Court

D. A. RICKS IS A DEFENDANT

Four civil actions have been docketed in the circuit court for trial, one suit being on a note, two on claims against estates and the fourth a petition to sell real estate.

The Merchants Bank of Muncie is plaintiff in the suit on a note and D. A. Ricks of this county is made defendant, the plaintiff alleging that there is a note overdue and judgment in the sum of \$750 is demanded.

Howard E. Barrett, executor of the will of James E. Hinchman, has filed a petition against Missouri Hinchman and others, the purpose of which is to obtain an order from the court to sell real estate, left by the deceased.

Jethro Meek is plaintiff in a claim filed against James H. Martin, administrator of the estate of William B. Martin, the demand being for \$7,600, which is alleged to be due on notes.

William Knecht has filed a claim against Edward F. Jackson, assignee of Franklin D. Miles, the demand being for \$400.

JOHN 'HOTSTUFF' BELL DIES

Dishwasher at Restaurant Suddenly
Afflicted With Heart Trouble

John (Hotstuff) Bell, employed at Madden's restaurant as a dishwasher, was taken ill this morning and died suddenly about 10 o'clock at the home of his sister, Mrs. Laura Betchol, 309 West Fourth street, death being caused from heart trouble. The deceased was well known here, and was about 70 years old. He resided with his sister, at whose home he died.

The funeral arrangements were not completed today, but will probably be held Thursday afternoon at the late residence, with interment in East Hill cemetery.

CARTHAGE CASE HEARD BY INDUSTRIAL BOARD

Appeal of James Sammons Against
Strawboard Factory For Com-
pensation, Conducted Here

INJURED HAND NEVER HEALED

A representative of the Industrial Board of the State of Indiana was here this morning conducting a hearing on the matter of James Sammons against the American Paper Products Company of Carthage, in which the plaintiff is seeking compensation for an injury which he sustained in December 1921, while in the employ of the Carthage factory.

Sammons had his left hand caught in some machinery and it was necessary to amputate a finger, and portions of other fingers, and he alleges that the injury has permanently crippled him, and upon this ground he has presented his case to the board under the workmen's compensation law. The matter was taken under advisement.

The hearing was conducted in the Commissioners' room at the court house, and the evidence required less than an hour, as only four witnesses were used, the principal ones being the plaintiff and his physician, Dr. George McNabb of Carthage.

"FAR-AWAY PRINCESS" NOT VERY FAR AWAY

Senior Class Play of Rushville High
School Will be Given April 27
And 28 at Auditorium

IS A MUSICAL COMEDY

(By MR. R. H. S.)

"The Far-Away Princess" is not very far away. She will appear Thursday and Friday evenings, April 27 and 28, at the Graham Annex auditorium. No, it's not an Indian Princess this time. It's the name of the show that the Senior Class will present this year. And take it from us, Ed, it's going to be some show.

Every year in R. H. S. the graduating class puts on a play. In previous years the plays have been light farces—society comedies—you know, the soup and fish kind where the "dramatis personae" strut around in evening clothes and smoke cigarettes and engage in a lot of mushy love scenes. But not so with "The Far-Away Princess." The play this year will be better and different, because the class of '22 is a better and different class.

"The Far-Away Princess" is a musical comedy, something that has never before been attempted by a Senior class. The cast, which by the way, includes almost every member of the class, is busily rehearsing every evening. Some of the high lights in the cast are: Mildred Norris, Carrol Nipp, John Ryan, Helen Bebout, Margaret Herkless, and many others. (No offence meant toward the "many others" whose names are not mentioned here.) So, our parting word of advice is: Mark off either the 28 or the 27 on your date calendar. Oh yes, no High School Dope tonight, we used up all of our time composing this drama write up.

UNION MEN DRIVEN FROM CITY, REPORT

District United Mine Workers Offi-
cials Investigate Story at
Stotesburg, W. Va.

SOME WORKERS ARE FIRED ON

Operators of Southwest Express
Willingness to Negotiate Wage
Scale With Miners

(By United Press)
Beekley, W. Va., April 4.—Investigation of reports that one hundred union miners have been driven out of Stotesburg, West Virginia, were begun today by district United Mine Workers officers and county officers. The miners were cornered and then marched out of the village, according to the reports. Operation of the Royal Coal Company of Royal West Virginia, were closed today by county officials, after workers failed to return after being fired upon. Union men denied any responsibility for the shooting.

Kansas City, April 4.—Coal operators of the southwest today had expressed a willingness to enter into negotiations with United Mine Workers for establishment of a new wage scale and working agreement. Basis of negotiations will be a return to the wage scale of 1917 which provides for a wage of \$3.60 a day as compared with \$7.50 under the expired agreement, according to W. L. A. Johnson, general commissioner for the southwestern interstate coal operators association. Johnson declared the operators are justified in seeking this wage scale in view of competitive conditions in surrounding coal producing states.

Indianapolis, Ind., April 4.—A coal shortage next winter will be precipitated upon the nation unless the great mine strike is ended soon, according to belief expressed at United Mine Worker headquarters here today.

Industries, utilities and domestic consumers now are drawing upon a 65,000,000 ton reserve, while they should be storing up a surplus to meet cold weather demands.

If the strike is prolonged through weeks of summer and the reserve is depleted, autumn will find the nation's bins stocked with a below normal supply and the railroads will be deluged with rush orders, it was said.

ROTARY CLUB ELECTS NEW DIRECTORS TODAY

Also Receives First "Lesson" In
Public Speaking From Jess
Pugh, Honorary member

... VIOLIN SOLOS ENJOYED ...

The Rotary club elected a new board of directors at the regular meeting of the club today and Jess Pugh, an honorary member of the club, who is home on a short vacation, gave Rotarians a "lesson" in public speaking.

Jess guaranteed that it was "worth ten by mail" and urged the closest attention of the embryonic orators of the club. He listed all of the necessary gestures in the order of their importance, illustrating each, and emphasized the importance of having a good introduction and an impressive ending, pointing out that what came in between mattered little. Jess kept the members of the club in an uproar all the time he was talking.

Miss Martha Winkenhofner played two numbers on the violin, with the piano accompaniment being provided by Miss Sarah I. McConnell, and was vigorously applauded.

The following directors were elected and will organize and choose the officers of the club from their number before the first Tuesday in May when they take office: L. L. Allen, W. O. Feudner, E. B. Thomas, Warder Wyatt, Hugh Mauzy, Carl Beher, Ralph Payne, Fred Bell and Roy Waggener.

BENJAMIN BOSSE DIES EARLY TODAY

Mayor of Evansville Three Terms
and World's Largest Manufac-
turer of Furniture

DEMOCRATIC STATE CHAIRMAN

City Controller is Sworn in as Suc-
cessor—Bosse's First Job Paid
\$10 a Month

Evansville, Ind., April 4.—Benjamin Bosse mayor of Evansville, world's largest furniture manufacturer and Democratic state chairman, died at 6:31 a. m. Tuesday at his mansion here.

Mayor Bosse was 46. Oxygen had been administered three times during the night in an effort to save the mayor's life. A short rally Monday afternoon had given hope to those at his bedside.

William Elmendorf was sworn in as mayor of Evansville at 10 a. m. today. He was city controller during the second and third terms of the late Mayor.

Born on a farm near Evansville, Bosse came to this city when he was 14. He secured a place in a grocery store at \$10 a month and board.

He rose from this position to that of mayor of Evansville, state Democratic chairman, president of the Globe-Bosse-World Factory, one of the largest furniture plants in the world, chairman of Evansville College executive committee and official in many other organizations.

He earned his way through business college. With three other men he organized the Globe factory in 1899. In November, 1921, Bosse was re-elected Mayor for his third term. He had been state chairman of the state Democratic committee for two years.

New Chairman Elected

Indianapolis, April 4.—A. C. Sallee of Indianapolis, was selected democratic state chairman today to succeed Benjamin Bosse who died at his home in Evansville.

Sallee was vice-chairman of the state committee, having acted as chairman prior to Bosse's election. Nuys and Bosse succeeded Sallee.

A new permanent chairman will be elected at the regular meeting of the state committee in May.

Sallee is about 40 years old. He is chairman of the seventh congressional district, comprised of Marion county.

Tentative arrangements were made to send a delegation from the state committee to Evansville to attend the Bosse funeral, but no one was selected.

FEW DEATHS FROM STARVING

Goodrich Says Good Work is Being
Done In Russia

Moscow, Russia, April 4.—Deaths from starvation have virtually ceased in Russia, wherever the American Relief Administration is at work, former Governor Goodrich of Indiana, who has just returned from the famine regions, has said today.

By the middle of April coal will be distributed everywhere in the famine region of the Volga territory and starvation will have ceased.

A little transportation ceases, Goodrich said, is not hindering the American Relief Association party and seven million people are now being fed.

BEGIN A COUNTER ATTACK

Washington, April 4.—Administration spokesmen in congress today began a counter attack on democrats who criticised President Harding's action in "firing all the executives of the bureau of engraving" without notice.

Democrats have introduced resolutions in congress demanding an investigation of the whole affair. The administration spokesmen accused the department employees of plotting with persons high in the Wilson administration to keep in touch within the government's surface.

TWO CIVIL SUITS FILED

One For An Account and On Note
Filed Before Justice Stech

Two civil suits have been filed in the court of Justice Stech, one being a suit on a note filed by Fred Hillgoss against William A. Billings and Willard Myers, the demand being for \$75. The suit has been set for trial on Thursday of this week at 1 o'clock.

The Hawkeye Oil Company of this city is the plaintiff in the other suit, with Oscar Reppert as defendant, and the demand being for \$40 on an account which is alleged to be uncollectable.

SIT UNDER SPELL OF GILLILAN'S WIT

Two Hundred Enjoy Noted Humorist
at Seventeenth Annual Banquet
of Rushville Commandery

SPECIAL MUSIC ON PROGRAM

For one hour and a half, Monday evening, a crowd of two hundred persons, consisting of members of Rushville commandery No. 49, Knights Templar, their wives and lady friends, sat under the spell of Strickland Gillilan's homely wit and humor at the seventeenth annual banquet of the commandery.

Gillilan, who was made famous over night by a poem he wrote while working on a Richmond newspaper, kept the banqueters laughing a greater part of the time with his frequent jabs at the foibles of men and women. He is no stranger to Rushville people because he once lectured at the Rush county chautauqua, and the committee in charge of the banquet had more requests at the last moment than they could accommodate. Many Knights who did not attend the banquet came up for the program afterwards.

Music for the evening was provided by Miss Martha Winkenhofner, violinist; Mrs. Marjorie Knecht, pianist, and Miss Vivian Harris, on the cornet.

Gillilan left at 10 o'clock last night for his home in Baltimore.

SPARKS SITTING IS AS SPECIAL JUDGE

Trial of Gath P. Freeman, Adminis-
trator, Against T. H. I. & E.
Traction Company Opens

IN FAYETTE CIRCUIT COURT

Connersville, Ind., April 4.—The case of Gath P. Freeman, administrator of the estate of the late G. L. Coddington, against the T. H. I. & E. traction company, a suit for \$10,000 damages, began Monday in the circuit court here with Judge Will M. Sparks of Rushville, acting as special judge, and a great many witnesses have been called for the case.

This is the fourth trial of the case. The action was sent here on a change of venue from Wayne county and has held attention for several years.

The case was first tried here in June 1917 and again in May 1918, after which an appeal was taken to the appellate court. It was sent back for trial October 4, 1920 and Will M. Sparks of the Rush circuit court was named as special judge. At the hearing here last year in September the jury disagreed. Judge Sparks is presiding in the hearing which was started Monday.

The case is the outgrowth of an accident near Richmond in 1915 in which Coddington who was driving a team was fatally injured. The horses became frightened at a traction car and Coddington was thrown from the wagon suffering injuries which resulted in his death.

POPE TO SEND A NOTE

Rome, Italy, April 4.—Pope Pius XVI intends sending a note to the heads of all governments participating in the Genoa conference advocating Pacific and disarmament item, it was reported today.

MEN'S NAMES ARE SOON FORGOTTEN

Dr. L. W. Munhall Reflects on Un-
certainty of Life Following
Visit to Indianapolis Cemetery

NEW NO ONE ON THE STREET

If We Permit God to Rule in Our
Lives, He Will Make Them a
Success, Evangelist Says

The attendance at the revival meeting Monday night at the M. E. church was more than good. The singing under the direction of O. P. Wamsley was excellent. The Rev. L. E. Brown, pastor of the Main the opening prayer. The Rev. C. S. Black, pastor of the church, made special announcement of the 2:30 afternoon meetings and urged the people to attend as the subject to be discussed would relate to the fundamental doctrines of historic Christianity.

Dr. Munhall then took the platform and told the audience he had spent most of the day in Indianapolis where he resided twenty-five years. He served in an Indianapolis regiment, the 79th, during the civil war. He said there was a time when if he met any one on the street that he did not know, he knew he had just arrived, but he walked the streets for some hours and recognized no one. He then went out to Crown Hill cemetery and felt at home for he knew almost everybody out there, all of which awakened memories and led to most solemn reflections.

"The great and successful, as men think, were here the other day, but now, their fortunes were scattered and but for their tomb stones their names, for the most part, are well nigh forgotten," the evangelist said.

And thus he was led to ask "what is the good of it all anyway?" He made the answer, "It is not worth the while, unless the life is lived in harmony with the revealed God. We are here tonight and soon we will be gone and forgotten. King Solomon's philosophy of life as expressed in Ecclesiastes, is absolutely correct. The Almighty one proposes to make life worth while."

"If we submit to Him, that He may guide in our affairs and rule in our lives, They will be well worth while and prove to be a magnificent success, no matter what our occupation."

The Doctor then announced his text: Hebrews 12:24 and preached the Gospel, showing how one could be reconciled to God and live and walk in unhindered fellowship with

W. E. WAGONER WILL TALK AT CONFERENCE

Rush County School Superintendent
on Program at I. U. School of
Education Meeting

SUPT. J. H. SCHOLL TO PRESIDE

W. E. Wagoner, county superintendent of schools, has been assigned a place on the program of the ninth annual conference on Educational Measurements which will be held under the auspices of the School of Education of Indiana University at Bloomington April 21 and 22.

Mr. Wagoner will speak at the Saturday afternoon session at 1:45 o'clock on the topic, "The Practicability of Intelligence Tests." J. H. Scholl, superintendent of the Rushville schools, will preside at this session.

The conference is held as one of the means of stimulating the application of educational measurements and other phases of educational research in the public schools of Indiana. The I. U. School of Education is placing increased emphasis on this phase of its work. All superintendents, principals and teachers who are interested in educational measurements have been invited to attend.

A PAGE FOR FARMERS

Depicting Activities of Greatest
Industry in Rush County.PURDUE LAMBS
SHOW PROFITSLoad Sold Recently at Purdue Re-
veals Standard Ration of Corn,
Clover and Silage the Best

NET PROFIT WAS \$1203

Lambs Fed Last Year at the Univer-
sity Showed Biggest Loss Ever
Sustained From Feeding

A load of lambs fed at the Purdue University Agricultural Experiment Station and recently sold returned the largest profit ever received from a load of stock fed at that institution. The net profit for the load was \$1203. This contrasts with the returns from a load of lambs fed last year when the largest losses ever sustained from feeding a load of stock at that institution occurred.

The lambs were fed to test the value of clover hay and oat straw as roughages for fattening lambs and to secure information on the most profitable quantities of corn to feed to such animals. All lots received corn silage.

The results show clearly that clover hay or some other leguminous roughage is far superior to oat straw or other non leguminous roughage for lambs. If leguminous roughage is not available, a liberal allowance of nitrogenous concentrates like cottonseed meal or linseed oilmeal is a great benefit to the ration.

Limiting the amount of corn fed was not as profitable as allowing as much grain as the lambs would eat. The lambs on full feed gained more rapidly and more economically than those receiving a half feed of corn or those fed corn during the latter part of the feeding period only. The most profitable ration of the test consisted of shelled corn, cottonseed meal, clover hay and corn silage. Lambs fed this ration returned a profit of \$6.03 per head.

"The high profits of this year compared to the extremely heavy losses of last year can not fail to impress the livestock man with the necessity of following consistently from year to year as well considered plan of livestock production", said F. G. King of the animal husbandry staff. "The man who tries to be in when everything looks good and out when conditions appear less favorable is too often out at the wrong time. The man who follows a definite program encounters losses during years of general losses but the profits during prosperous years more than compensate for the losses of bad years."

URGE SPRAYING FOR
BUGS AND TIP BURNCan Keep Potato Vines, Affected
With Tip Burn Green By Spray-
ing With Bordeaux Mixture

150 LB. PRESSURE NEEDED

Spraying in Rush county is followed by most farmers in order to get rid of potato bugs but spraying to control diseases and keep the vines vigorous is not commonly done. The practice of thoroughly spraying has given increases in other parts of the state, of as much as 30 bushel per acre. Whether or not growers can afford to spray in Rush county will depend upon conditions in your potato field. If your vines die before frost on the late crop or the early ones die prematurely with tip burn, then you can keep them green and growing about two weeks longer, by thorough spraying with Bordeaux mixture.

However, unless you are equipped with a sprayer, that will deliver 150 pounds pressure under three nozzles to a row, then you had better not spray with Bordeaux mixture for tests have shown that only thorough spraying with high power will give increased yields.

Bordeaux mixture can be mixed with lead arsenate and the bugs controlled at the same time. The first spray is usually applied when the vines are about four to six inches high and repeated every ten days to two weeks until four applications are made.

Just how to make Bordeaux mixture, proper equipment, and how to arrange it is all given in Purdue Extension Bulletin 89 which may be had at the county agent's office free of charge.

UNIQUE EDUCATIONAL
EXHIBIT AT SCHOOLDisplay by Jackson Township Agri-
cultural Teacher Covers a Wide
Variety of Farm Subjects

FINISHED PRODUCTS SHOWN

The Osborne school house, Jackson township, was the scene of a unique educational exhibit last Friday afternoon. The exhibit covered a variety of subjects, including specimens of noxious weeds and insect pests and charts showing methods for their control, samples of various fertilizers and plant food carriers, exhibits of seed grains and products manufactured from common farm products.

Among the exhibits which attracted a great amount of attention and interest were displays of mountings which showed the progressive processes in the manufacture of silk from the cocoon of the silk worm, linen from flax and cloth from wool and cotton.

The exhibit was assembled from a number of sources and required a great amount of time to collect, upon the part of the agricultural teacher, Lowell DeMoss, who was responsible for the display.

JACKSON FARMERS TO MEET

The regular monthly meeting of the Jackson Township Farmers association will be held at Osborne school house Thursday evening it was announced today.

TIME FOR TESTING
OF SEED ALL TAKENCounty Agent Has Enough Corn on
Hand Now to Keep Plant in
Operation Until May 1

ROOM FOR NO MORE SEED

A Total of 9,886 Ears Given The
Individual Ear Test For Germi-
nation And Disease

It has been announced by the county agent's office that acceptance of seed corn testing application has been discontinued because enough testing has been spoken for to keep the plant running up to May 1, beyond which date it is not desirable to continue the work.

To date 9,886 ears have been given the individual ear test for germination and disease. Of this number 764 or 7 per cent has been discarded because of imperfect germination, and 1430 ears, or about 14 percent thrown out because of disease. This makes a total of about 21 percent of the seed which has been rejected as unfit to plant.

Thirty-three farmers have obtained testing paper at the office and are testing their own seed at home by the same method used at the central plant. Reports from a number of these men indicate that they are throwing out about the same percent as is being discarded at the central plant.

While the plant now has all the corn that it will be able to take care of, the county agent announces that the office will continue to give assistance to farmers who test their own corn at home. The office can assist in the reading of the tests, either at the office or by a visit to the farm.

NATIVE PASTURES ARE
NOW LESS ABUNDANTCultivated Land Causes Shortage
and Seed Combinations Are Sug-
gested for Grazing Lands

SHOULD BE PERMANENT FIELD

Native pastures are becoming less abundant with the increase of cultivated land. These native pastures frequently do not have heavy stands of plants and consequently not a stiff sod.

Red clover and timothy are the seeds usually sowed by farmers for pasture, because of the cheapness of the seed and certainty of a stand. However, such a seeding is not very permanent and timothy is not a particularly good pasture plant, says Prof. M. L. Fisher of the soils and crops department of the Purdue School of Agriculture. A better combination for ordinary soils is as follows per acre:

Timothy 4 lbs.
Red clover 5 lbs.
Alsike clover 4 lbs.
Kentucky blue grass 15 lbs.
Red top 4 lbs.

Sow the clovers in the spring; the timothy, blue grass and red top in either spring or autumn, preferably autumn. Sowings can be made on oats, but preferably with wheat or rye, or alone.

Pastures should be dressed annually with 200 pounds per acre of a fertilizer carrying two to four percent nitrogen, 12 to 14 percent phosphoric acid, and two to four percent potash. Liming once in five years and a covering of manure once in three years will greatly aid success.

Cleveland Produce

Cleveland, Ohio, April 4.—Butter, extra in tubs 42@42½; prints 43@43½; extra firsts 41@41½; packing stock 17@19. Eggs: Fresh gathered Northern extras 28; extra firsts 27; Ohio 25@25½; Western firsts new cases 24.

Poultry unchanged.

NEW COINS RECEIVED

The People's National bank today received a supply of new Grant memorial coins which have just been issued by the United States treasury. The coins are in fifty cent silver pieces and one dollar gold pieces. Grant was born on April 27, 1822 and this year is the hundredth anniversary of his birth.

TO COMPLETE PLAN
WITHIN 90 DAYSU. S. Grain Growers, Inc., Making
Arrangements to Handle Grain
On Principal Markets

55,000 FARMERS CONTRACT

First Offices To Be At Chicago,
Omaha and Minneapolis—
Indianapolis to Come Next

Chicago, Ill., April 4.—Arrangement for handling grain on the principal market adjacent to territory in which 55,000 farmers already are under contract with the U. S. Grain Growers, Inc., will have been completed in 90 days, according to a statement released by executive officers of the co-operative grain firm.

First, sales offices will be set up in the Chicago, Omaha and Minneapolis markets and efforts will then be directed toward establishing selling agencies on the Indianapolis and Kansas City markets.

The U. S. Grain Growers, Sales Company, subsidiary of the marketing association, is under the direction of the executive officers of the U. S. Grain Growers, Inc., so that they may supervise the details of getting the machinery in working order without creating additional salaries positions. Employment of a high type executive of experience, who will be placed in charge of the actual operations of the company, and sub-executives for the branch agencies is being given attention at the present time. In connection, it is pointed out that the volume of approximately 125,000,000 bushels to be handled in 1922 will exceed that of any other single grain firm in the world.

"The article of incorporation of the sales company are broad enough to provide means of selling for export or ownership of warehousing facilities on the terminal markets," according to a statement made by President C. H. Gustafson, Secretary Frank M. Meyers and Vice-president James K. Mason of the farmer's company. "Likewise, it will be able to finance movement of grain to the same extent as other grain firms in the markets do at the present time."

"Members of the U. S. Grain Growers will in reality have two methods of controlling the sales company under the form of organization which has been adopted. First, they have direct control of the U. S. Grain Growers, Inc., itself through membership and election of the directors who will be primarily responsible for its management. Second, they will have another line of control in the capacity of stockholders of the company or through stock ownership in local elevators whom it is expected will own the principal part of the preferred stock of the sales company."

Control of the selling organization through voting stock is vested in both common and preferred stock. Issues of \$125,000 of each class of stock of \$100 denomination will be prepared forthwith and the preferred issue sold the farmers' co-operative elevators and individuals members of the U. S. Grain Growers, Inc., while the common stock will be held by or for the parent organization. Preferred stock will return a seven per cent cumulative dividend which must be paid before a dividend can be declared on the common. The preferred, likewise, is redeemable at 10 per cent above par and must be offered first to the U. S. Grain Growers, Inc., whenever the original purchaser wishes to sell.

A feature of the new organization emphasized by the Grain Growers officers is that the affiliated farmers elevators may ship direct to the market center which offers the most favorable prices. All savings will be cleared from the general office in Chicago so that business may be transacted with any or all branches agencies without complicating this procedure.

Commissions and earnings realized by the selling company as declared dividends on the common stock, held by or for the U. S. Grain Growers, Inc., will be returned with other profits realized by the farmers' company to the affiliated elevators for distribution to Grain Grower members on the basis of amount of grain sold through the association. In this way, the co-operative idea will be carried out in every detail and yet the business will have been conducted in the manner customary and usual at the present time.

TO MARKET GRAIN IN
MANY LARGE-MARKETSU. S. Grain Growers Sales Com-
pany To Operate Along Plan of
"Committee of Seventeen"

AUXILIARY ORGANIZATION

Chicago, April 4.—U. S. Grain Growers sales company, an auxiliary organization to the U. S. Grain Growers Inc., will be in a position to market grain in the several large markets within 90 days.

Announcement to this effect was made today by C. H. Gustafson, president of the organization.

The company will operate along the plan of the "committee of 17". Relative to the recent convention of the organization a statement issued today said:

"There is no disposition on the part of the present United States Grain Growers' administration to flout their victory in the faces of those who held contrary views."

Six of the newly elected directors of the United States Grain Growers Inc., from Illinois and North Dakota have notified the executive officers by a signed resolution that "they will decline to attend the meetings of said board until such a time as they in justice is remedied," referring to action taken at the recent annual convention.

farmers' elevators and Grain Growers association in territory tributary to each branch office, are required under the by-laws of the sales company. These boards will represent the viewpoint of their particular marketing zone in advising the management and directorate with respect to sectional problems and politics.

Action taken by the United States Supreme Court on the Capper Trencher Bill, known as the Futures Trading Act, will not effect the operation of the subsidiary selling company either way, it is said. The form of organization which has been adopted would be desirable whether or not the Futures Trading Act is declared unconstitutional, the farmer officials point out, inasmuch as the Omaha, Milwaukee and other grain exchanges have not made application for designation as contract markets under the act, which specifically affects only those markets where trading in grain futures is carried on.

INFLUENCE IN
THE TRADE SEENEffect of U. S. Grain Growers, Inc.,
Reflected By Renewed Attack
On Co-operative Marketing

STATEMENT BY GUSTAFSON

President of Farmers Organization
Says He Is Pleased With
Growth of Association.

Chicago, April 4.—Favorable influence of the U. S. Grain Growers Inc., in the grain trade is reflected in renewed attacks on co-operative grain marketing, according to C. H. Gustafson, president of the farmers' company, in a statement to members made public today. The statement in full is as follows:

"A great deal of misleading, untruthful and malicious propaganda regarding the U. S. Grain Growers, Inc. and its aims, purposes and progress is being spread broadcast throughout the grain producing sections of the United States, which farmers urge me to answer. In many years of farm organization work and co-operative development, I have found little time to answer the thousands of attacks made upon the co-operative movement. Attacks made on the U. S. Grain Growers and the result obtained have demonstrated the wisdom of continuing such a policy.

"In spite of all the propaganda spread by our opposition, no defects have been discovered in the 'committee of seventeen' plan which the U. S. Grain Growers, Inc. is putting into effect. Farmers are doing their own thinking and are joining the Grain Growers ranks by thousands.

"I want to say to all our members and others, whether friend or opponents of co-operative development, that we are all well pleased with our growth to date. With more than 51,000 members who will market at least 100,000,000 bushels of grain through U. S. Grain Growers channels this year, we have no apologies to offer. We are building slowly, but safe and sound. The influence of the U. S. Grain Growers, Inc. in the grain trade already is quit a factor favorable to grain producers. If we 'hold the fort', better conditions for the grain producers will soon be in evidence. Those who have placed their faith in the U. S. Grain Growers, Inc. shall not be disappointed.

TO MARKET LIVESTOCK
DIRECTLY IN CAPITOLMade Possible by Establishment of
Producers' Commission Assoc-
iation at Terminal Stockyards

TO BE ON PROFITABLE BASIS

Indianapolis April 4.—Farmers who are members of the Indiana Federation of Farmers Association will market their livestock directly at Indianapolis in a few days.

This was made possible today by the establishment of a producers commission association to serve at the Indianapolis terminal stockyards. The commission will sell livestock for the farmers and will pro-rate to them the proceeds of the sales less the cost of operating the organization which will operate strictly on a profitable basis, according to members of the commission.

Members of the commission said they expected to control the flow of livestock in the near future from all over Indiana, except in the northern part of the state where producers now ship to the East Buffalo terminal.

F. M. Simpson, of Chicago, representing the National Producers association attended the meeting to which the commission was formed. Members of the federation's livestock committee which met today to form the commission are: C. E. Paul, of Winamac; George M. Brown, Angola; B. F. Catherwood, Dayton; W. H. Settle, Petroleum; A. E. Williams, Lebanon; P. L. Ludvig, Winchester; John W. Riter, Elmore; John F. Hull, Patoka; George F. Stahl, Seymore; and Harry Carr, Hartsville.

Soy Beans build up the soil like clover, and nothing beats them as a green manure crop.

PURDUE LAMBS SHOW PROFITS

Load Sold Recently at Purdue Reveals Standard Ration of Corn, Clover and Silage the Best

NET PROFIT WAS \$1203

Lambs Fed Last Year at the University Showed Biggest Loss Ever Sustained From Feeding

A load of lambs fed at the Purdue University Agricultural Experiment Station and recently sold returned the largest profit ever received from a load of stock fed at that institution. The net profit for the load was \$1203. This contrasts with the returns from a load of lambs fed last year when the largest losses ever sustained from feeding a load of stock at that institution occurred.

The lambs were fed to test the value of clover hay and oat straw as roughages for fattening lambs and to secure information on the most profitable quantities of corn to feed to such animals. All lots received corn silage.

The results show clearly that clover hay or some other leguminous roughage is far superior to oat straw or other non leguminous roughage for lambs. If leguminous roughage is not available, a liberal allowance of nitrogenous concentrates like cottonseed meal or linseed oilmeal is a great benefit to the ration.

Limiting the amount of corn fed was not as profitable as allowing as much grain as the lambs would eat. The lambs on full feed gained more rapidly and more economically than those receiving a half feed of corn or those fed corn during the latter part of the feeding period only. The most profitable ration of the test consisted of shelled corn, cottonseed meal, clover hay and corn silage. Lambs fed this ration returned a profit of \$6.03 per head.

"The high profits of this year compared to the extremely heavy losses of last year can not fail to impress the livestock man with the necessity of following consistently from year to year as well considered plan of livestock production," said F. G. King of the animal husbandry staff. "The man who tries to be in when everything looks good and out when conditions appear less favorable is too often out at the wrong time. The man who follows a definite program encounters losses during years of general losses but the profits during prosperous years more than compensate for the losses of bad years."

URGE SPRAYING FOR BUGS AND TIP BURN

Can Keep Potato Vines, Affected With Tip Burn, Green By Spraying With Bordeaux Mixture

150 LB. PRESSURE NEEDED

Spraying in Rush county is followed by most farmers in order to get rid of potato bugs but spraying to control diseases and keep the vines vigorous is not commonly done. The practice of thoroughly spraying has given increases in other parts of the state, of as much as 30 bushel per acre. Whether or not growers can afford to spray in Rush county will depend upon conditions in your potato field. If your vines die before frost on the late crop or the early ones die prematurely with tip burn, then you can keep them green and growing about two weeks longer, by thorough spraying with Bordeaux mixture.

However, unless you are equipped with a sprayer, that will deliver 150 pounds pressure under three nozzles to a row, then you had better not spray with Bordeaux mixture for tests have shown that only thorough spraying with high power will give increased yields.

Bordeaux mixture can be mixed with lead arsenate and the bugs controlled at the same time. The first spray is usually applied when the vines are about four to six inches high and repeated every ten days to two weeks until four applications are made.

Just how to make Bordeaux mixture, proper equipment, and how to arrange it is all given in Purdue Extension Bulletin 89 which may be had at the county agent's office free of charge.

UNIQUE EDUCATIONAL EXHIBIT AT SCHOOL

Display by Jackson Township Agricultural Teacher Covers a Wide Variety of Farm Subjects

FINISHED PRODUCTS SHOWN

The Osborn school house, Jackson township, was the scene of a unique educational exhibit last Friday afternoon. The exhibit covered a variety of subjects, including specimens of noxious weeds and insect pests and charts showing methods for their control, samples of various fertilizers and plant food carriers, exhibits of seed grains and products manufactured from common farm products.

Among the exhibits which attracted a great amount of attention and interest were displays of mountings which showed the progressive processes in the manufacture of silk from the cocoon of the silk worm, linen from flax and cloth from wool and cotton.

The exhibit was assembled from a number of sources and required a great amount of time to collect, upon the part of the agricultural teacher, Lowell DeMoss, who was responsible for the display.

JACKSON FARMERS TO MEET

The regular monthly meeting of the Jackson Township Farmers association will be held at Osborn school house Thursday evening it was announced today.

TIME FOR TESTING OF SEED ALL TAKEN

County Agent Has Enough Corn on Hand Now to Keep Plant in Operation Until May 1

ROOM FOR NO MORE SEED

A Total of 9,886 Ears Given The Individual Ear Test For Germination And Disease

It has been announced by the county agent's office that acceptance of seed corn testing application has been discontinued because enough testing has been spoken for to keep the plant running up to May 1, beyond which date it is not desirable to continue the work.

To date 9,886 ears have been given the individual ear test for germination and disease. Of this number 764 or 7 per cent has been discarded because of imperfect germination, and 1430 ears, or about 14 percent thrown out because of disease. This makes a total of about 21 percent of the seed which has been rejected as unfit to plant.

Thirty-three farmers have obtained testing paper at the office and are testing their own seed at home by the same method used at the central plant. Reports from a number of these men indicate that they are throwing out about the same percent as is being discarded at the central plant.

While the plant now has all the corn that it will be able to take care of, the county agent announces that the office will continue to give assistance to farmers who test their own corn at home. The office can assist in the reading of the tests, either at the office or by a visit to the farm.

NATIVE PASTURES ARE NOW LESS ABUNDANT

Cultivated Land Causes Shortage and Seed Combinations Are Suggested for Grazing Lands

SHOULD BE PERMANENT FIELD

Native pastures are becoming less abundant with the increase of cultivated land. These native pastures frequently do not have heavy stands of plants and consequently not a stiff sod.

Red clover and timothy are the seeds usually sowed by farmers for pasture, because of the cheapness of the seed and certainty of a stand. However, such a seeding is not very permanent and timothy is not a particularly good pasture plant, says Prof. M. L. Fisher of the soils and crops department of the Purdue School of Agriculture. A better combination for ordinary soils is as follows per acre:

Timothy 4 lbs.
Red clover 5 lbs.
Alsike clover 4 lbs.
Kentucky blue grass 15 lbs.
Red top 4 lbs.

Sow the clovers in the spring; the timothy, blue grass and red top in either spring or autumn, preferably autumn. Sowings can be made on oats, but preferably with wheat or rye, or alone.

Pastures should be dressed annually with 200 pounds per acre of a fertilizer carrying two to four percent nitrogen, 12 to 14 percent phosphoric acid, and two to four percent potash. Liming once in five years and a covering of manure once in three years will greatly aid success.

Cleveland Produce

Cleveland, Ohio, April 4.—Butter, extra in tubs 42@42½; prints 43@43½; extra firsts 41@41½; packing stock 17@19. Eggs: Fresh gathered Northern extras 28; extra firsts 27; Ohio 25@25½; Western firsts new cases 24.

NEW COINS RECEIVED

The People's National bank today received a supply of new Grant memorial coins which have just been issued by the United States treasury. The coins are in fifty cent silver pieces and one dollar gold pieces. Grant was born on April 27, 1822 and this year is the hundredth anniversary of his birth.

TO COMPLETE PLAN WITHIN 90 DAYS

U. S. Grain Growers, Inc., Making Arrangements to Handle Grain On Principal Markets

55,000 FARMERS CONTRACT

First Offices To Be At Chicago, Omaha and Minneapolis—Indianapolis to Come Next

Chicago, Ill., April 4.—Arrangement for handling grain on the principal market adjacent to territory in which 55,000 farmers already are under contract with the U. S. Grain Growers, Inc., will have been completed in 90 days, according to a statement released by executive officers of the co-operative grain firm. First, sales offices will be set up in the Chicago, Omaha and Minneapolis markets and efforts will then be directed toward establishing selling agencies on the Indianapolis and Kansas City markets.

The U. S. Grain Growers, Sales Company, subsidiary of the marketing association, is under the direction of the executive officers of the U. S. Grain Growers, Inc., so that they may supervise the details of getting the machinery in working order without creating additional salaries positions. Employment of a high type executive of experience, who will be placed in charge of the actual operations of the company, and sub-executives for the branch agencies is being given attention at the present time. In connection, it is pointed out that the volume of approximately 125,000,000 bushels to be handled in 1922 will exceed that of any other single grain firm in the world.

"The article of incorporation of the sales company are broad enough to provide means of selling for export or ownership of warehousing facilities on the terminal markets," according to a statement made by President C. H. Gustafson, Secretary Frank M. Meyers and Vice-president James K. Mason of the farmer's company. "Likewise," it will be able to finance movement of grain to the same extent as other grain firms in the markets do at the present time.

"Members of the U. S. Grain Growers will in reality have two methods of controlling the sales company under the form of organization which has been adopted. First, they have direct control of the U. S. Grain Growers, Inc., itself through membership and election of the directors who will be primarily responsible for its management. Second, they will have another line of control in the capacity of stockholders of the company or through stock ownership in local elevators whom it is expected will own the principal part of the preferred stock of the sales company.

Control of the selling organization through voting stock is vested in both common and preferred stock. Issues of \$125,000 of each class of stock of \$100 denomination will be prepared forthwith and the preferred issue sold the farmers' co-operative elevators and individuals members of the U. S. Grain Growers, Inc., while the common stock will be held by or for the parent organization. Preferred stock will return a seven per cent cumulative dividend which must be paid before a dividend can be declared on the common. The preferred, likewise, is redeemable at 10 per cent above par and must be offered first to the U. S. Grain Growers, Inc., whenever the original purchaser wishes to sell.

A feature of the new organization emphasized by the Grain Growers officers is that the affiliated farmers elevators may ship direct to the market center which offers the most favorable prices. All savings will be cleared from the general office in Chicago so that business may be transacted with any or all branches agencies without complicating this procedure.

Commissions and earnings realized by the selling company as declared dividends on the common stock, held by or for the U. S. Grain Growers, Inc., will be returned with other profits realized by the farmers' company to the affiliated elevators for distribution to Grain Grower members on the basis of amount of grain sold through the association. In this way, the co-operative idea will be carried out in every detail and yet the business will have been conducted in the manner customary and usual at the present time.

Local advisory boards, appointed from the responsible officers of

TO MARKET GRAIN IN MANY LARGE-MARKETS

U. S. Grain Growers Sales Company To Operate Along Plan of "Committee of Seventeen"

AUXILIARY ORGANIZATION

Chicago, April 4.—U. S. Grain Growers sales company, an auxiliary organization to the U. S. Grain Growers Inc., will be in a position to market grain in the several large markets within 90 days.

Announcement to this effect was made today by C. H. Gustafson, president of the organization.

The company will operate along the plan of the "committee of 17". Relative to the recent convention of the organization a statement issued today said:

INFLUENCE IN THE TRADE SEEN

Effect of U. S. Grain Growers, Inc., Reflected By Renewed Attack On Co-operative Marketing

STATEMENT BY GUSTAFSON

President of Farmers Organization Says He Is Pleased With Growth of Association.

Chicago, April 4.—Favorable influence of the U. S. Grain Growers Inc., in the grain trade is reflected in renewed attacks on co-operative grain marketing, according to C. H. Gustafson, president of the farmers' company, in a statement to members made public today. The statement in full is as follows:

"A great deal of misleading, untruthful and malicious propaganda regarding the U. S. Grain Growers, Inc. and its aims, purposes and progress is being spread broadcast throughout the grain producing sections of the United States, which farmers urge me to answer. In my many years of farm organization work and co-operative development, I have found little time to answer the thousands of attacks made upon the co-operative movement. Attacks made on the U. S. Grain Growers and the result obtained have demonstrated the wisdom of continuing such a policy.

"In spite of all the propaganda spread by our opposition, no defects have been discovered in the 'committee of seventeen' plan which the U. S. Grain Growers, Inc. is putting into effect. Farmers are doing their own thinking and are joining the Grain Growers ranks by thousands.

"I want to say to all our members and others, whether friend or opponents of co-operative development, that we are all well pleased with our growth to date. With more than 51,000 members who will market at least 100,000,000 bushels of grain through U. S. Grain Growers channels this year, we have no apologies to offer. We are building slowly, but safe and sound. The influence of the U. S. Grain Growers, Inc. in the grain trade already is a factor favorable to grain producers. If we 'hold the fort', better conditions for the grain producers will soon be in evidence. Those who have placed their faith in the U. S. Grain Growers, Inc. shall not be disappointed.

TO MARKET LIVESTOCK DIRECTLY IN CAPITOL

Made Possible by Establishment of Producers' Commission Association at Terminal Stockyards

TO BE ON PROFITABLE BASIS

Indianapolis April 4.—Farmers who are members of the Indiana Federation of Farmers Association will market their livestock directly at Indianapolis in a few days.

This was made possible today by the establishment of a producers commission association to serve at the Indianapolis terminal stockyards. The commission will sell livestock for the farmers and will pro-rate to them the proceeds of the sales less the cost of operating the organization which will operate strictly on a profitable basis, according to members of the commission.

Members of the commission said they expected to control the flow of livestock in the near future from all over Indiana, except in the northern part of the state where producers now ship to the East Buffalo terminal.

F. M. Simpson, of Chicago, representing the National Producers association attended the meeting to which the commission was formed.

Members of the federation's livestock committee which met today to form the commission are: C. E. Paul, of Winamac, George M. Brown, Angola; B. F. Catherwood, Dayton; W. H. Settle, Petroleum; A. E. Williams, Lebanon; P. L. Ludvig, Winchester; John W. Riter, Elmore; John F. Hull, Patoka; George F. Stahl, Seymour; and Harry Carr, Hartsville.

Soy Beans build up the soil like clover, and nothing beats them as a green manure crop.

PERSONAL POINTS

—Mrs. J. C. Sexton was a visitor in Indianapolis today.

—Mrs. Will Mulno spent today in Indianapolis on business.

—Mrs. Will S. Meredith spent the day in Indianapolis on business.

—Mrs. Alvan Moor went to Indianapolis today where she visited friends.

—Charles Winslow of Gynneville transacted business in this city this morning.

—The Misses Nora and Mary Sleeth were passengers to Indianapolis today.

—Webb Woodfil of Washington, D. C., spent Monday in this city, the guest of friends.

—Mrs. Edna Rockefeller of Brookville, Ind., is spending several days in this city visiting friends.

—Frank Cutler of Indianapolis is spending a few days in this city, the guest of relatives and friends.

—George L. Gray and son Weldon of Liberty spent Monday with Mr. and Mrs. George Gray, east of the city.

—Mrs. Ida M. Gray has returned home from a week-end visit with Mr. and Mrs. W. E. Waddell of Indianapolis.

—Mrs. Hugo Schmalzel of this city and her daughter, Mrs. Robert Higgins of Connersville spent today in Indianapolis.

—Frank Wooster of Anderson has been called to this city on account of the serious illness of his aunt, Mrs. James Miller, living west of the city.

—Mrs. J. M. Fitzgerald who has been visiting Mrs. Ralph Payne in this city for a few days, returned to her home in Indianapolis this morning. She was accompanied by Mrs. Payne.

—Mr. and Mrs. W. R. Covertson of Goshen, Ind., formerly of this city, attended the Knights Templar banquet here Monday evening.

DYE STOCKINGS

OR SWEATER IN

"DIAMOND DYES"

"Diamond Dyes" add years of wear to worn, faded, skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, fadeless colors into her worn garments or draperies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

his maker. "The blood of sprinkling referred to the blood of Christ, shed for the last world," he said, "The blood of Abel referred to the blood of Abel's offering that he brought to God, through which he found favor with his Maker. We are redeemed by the blood of Christ, justified, saved, cleansed, overcome the devil, death and hell and are complete in Him."

The congregation united spiritedly in an appropriate hymn and dismissed with a Quaker benediction.

International 8-16

A Two-Plow Tractor That PULLS Two Plows AND THEN SOME

Performance of the International 8-16 in hundreds of competitive tests on farms proves that this tractor can and does pull its rated load—regardless of soil conditions. Working alongside of some so-called 2-plow tractors, the International has repeatedly out-performed them.

International owners say—"I use it on farm land where other tractors wouldn't go"—"I have used an International 8-16 for three years and it is the best all round tractor that I have seen"—"We purchased an International 8-16 because it excelled other 2-plow tractors in power, equipment, safety and ease of operation."

This proved performance is one of the reasons why we are justified in saying that the International 8-16 is the greatest 2-plow tractor value ever offered.

\$670 f. o. b. Chicago

Free Plow Offer Expires May 1st

Between now and May 1st we will give to every purchaser of an International 8-16 tractor a genuine 2-bottom P & O plow FREE, f. o. b. Chicago. But this is a special offer good only until May 1st and demands quick action. See us today.

(Under the same conditions a 3-bottom plow will be given free with each Titan 10-20 tractor at \$700. Both tractor and plow f. o. b. Chicago.)

KILLING OF FLIER EXPLAINED BY JUDGE

Jean P. Day, Former Member of Oklahoma Supreme Court, Admits Accidental Shooting

LIEUT. COL. BECK WAS VICTIM

(By United Press)

Oklahoma City, Okla., April 4.—Lieut. Col. Paul Ward Beck, post field army flyer, removed from the home of Judge Jean P. Day, Oklahoma financier and former member of the Oklahoma supreme court commission, today dead, with his features disfigured and a bullet hole in his head. Mrs. Day who witnessed the shooting is hysterical and is

under a physician's care.

Coroner McWilliams said that Day told him the officer had made improper advances toward Mrs. Day. Guests at the Day bridge party say there existed to all outward appearances utmost cordiality between Day and Beck.

Judge Day is alleged to have given the following version of Lieut. Col. Beck's death to county officers. "A number of people had been at my home where we were having a party. My friends and I had just taken some of them home. When I returned I drove up on the driveway beside the house.

"The window blinds were up and lights were on, so I could see in the house. I stopped my car and saw Beck grab at my wife. They had quite a scuffle. I got out of my car, went into the front door and upstairs. As I went upstairs, Beck

ran into the dining room behind the curtains.

"When I came back down with my gun in my hands, I told Beck to get out of the house. He started at me, as though he was going to hit me and I struck at him with my gun. I aimed to hit him over the head and the gun went off and shot back.

IRONS OUT TROUBLES

Washington, April 4.—Governor E. Mont Reilly of Porto Rico has ironed out his difficulties with native political leaders there and everything is going nicely," he advised President Harding in a telegram just received at the White House, it was

learned today. White House officials denied flatly reports that Reilly is to resign to be given an important position in Washington. They said his last telegrams indicated no desire to leave his present post.

Relieves Headache

A little Musterole, rubbed on forehead and temples, will usually drive away headache. A clean, white ointment, made with oil of mustard, Musterole is a natural remedy with none of the evil after-effects so often caused by "internal medicine."

Keeping Fit

"Keep Fit" is the keynote of National Physical Culture Week which will be observed May 1 to 8, and the slogan is one million health pledges. The committee in charge of the special week has prescribed a personal health program which it hopes to see installed in every home in the land, and with its observance would come a healthier race of people and likewise a happier people.

You may or may not agree with the program, but it is a good one to tie to even though you might want to change it in some particulars.

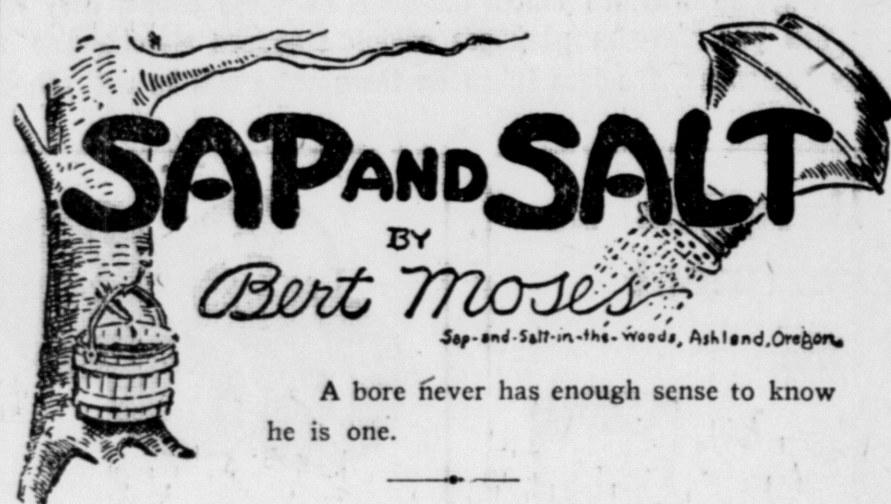

1. Spend ten minutes each morning in setting-up exercises.
2. Sleep with windows open and secure what sunshine you can.
3. Spend a minimum of ten hours during the week in the open air. Balance work and play.
4. Walk at least three miles each day.
5. Treat your stomach with respect. Do not overeat.
6. Eat meat not more than once each day.
7. Balance your meals with fruit, green salads and other vegetables.
8. Drink at least eight glasses of pure water daily.
9. Completely relax for at least fifteen minutes each day and conserve your nerve energy.
10. Cultivate happy thoughts. Think in terms of health. Arrange all plans for the week upon a basis such that each day's activities will be consistent with the requirements of keeping fit.

Follow this program and we will never regret it. Many have found that this mode of living is the most fruitful and makes us better equipped to meet the vexing problems that beset us daily. It is a modern and more extended version of the philosophy of correct living which some of our far-seeing forefathers practiced.

There were a few in the days gone by who realized what proper living standards were, as is illustrated by the story which has been repeated in the medical profession for years.

There was once a physician, so the story runs, who was very successful in his practice. Many in the locality sought the secret of his success. He always told them that he had it in a large book which he kept safely in his office. It was an immense volume which no one had ever had the privilege of opening. When he died, the physician willed the book to his children and instructed them to open it and read the contents.

On the first page they found three simple rules as the secret of good health—That he who wanted to live a long, happy and useful life should keep his body free from bodily poisons, keep his head cool and his mind free from worry. The other pages were blank.

A bore never has enough sense to know he is one.

Everybody is a "sucker" for somebody.

Being 51 per cent good is about all you can expect of anybody.

Big men differ widely, but little men are much the same.

Always try to have a good excuse ready before doing something mean.

Muscular development is better accomplished in beating a rug than in playing kelly pool.

HEZ HECK SAYS:

"You can't put much dependence in a fine comb if some of the teeth is missin'."

Current Comment

The Farmers and the Unions

(Philadelphia North American)
The farmer is by necessity an independent, self-sufficient individualist. He is a capitalist, a proprietor, a manufacturer, an employer of labor. He represents the largest single class of consumers using the goods which labor makes, and every successful effort by labor to increase its wage return is felt by him.

Avowed and dominant purposes of labor unionism are to shorten the working day, to establish arbitrary and uniform conditions of employment and to restrict per capita production. All these aims are at war with the interest of the farmer. He cannot recognize an eight-hour or ten-hour day, because his tasks cannot be deferred and because his operations to a great extent are controlled by the seasons and the uncertainties of the weather. Nor can he adopt uniform rules of work, because there is no uniformity in his problems. And finally, he is always striving to expand production, not to contract it.

The two classes are conscious of economic antagonism. Organized labor is the first to protest when the foodstuffs raised by the farmer raise in price; and the farmer is the first to complain when the cost of goods manufactured by organized labor increases because of wage inflation. This conflict of interest is natural and will continue.

A basic difference is that the farmer has two distinct operating problems, while labor has but one. The farmer must first grow his crops, and then market them; he is at once a producer and a merchandiser. As we have indicated, in the field of production his interests are not the same as those of labor, nor is his collective action feasible. In disposing of his output, however, he finds benefit in collective action; but there is no common ground with labor here, for the labor does not market what it produces.

Despite these inherent differences, leaders of organized labor strive to make it appear that the farmers view with growing favor the idea of an alliance between the two groups.

The truth is that the farmer's sympathies were never alienated from organized labor to so great an extent as at the present time.

How remote is the chance of a sympathetic combination between the farmers and organized labor was shown at the national agricultural conference recently held at the call of the president. Altho the delegates included representatives of banking and industry and organized labor and other interests, the gathering expressed with uncompromising vigor the determination of the farming community to resist with equal force unjust exactions by capital and by labor.

The farmer has not relaxed his vigilance or his defensive measures against the power of capital; but he has come to regard organized labor as an additional force against which he must protect himself. During the years when the workers were struggling against odds to establish their rights, the farmer gave them sympathy and support, because the two groups had a common interest in curbing the oppressive power of capitalistic combinations. But when he perceived that organized labor, whenever it acquired a dominating position, developed tendencies as arbitrary and arrogant as those of capital, he came to regard the unions as a hostile element.

Never in history of the agricultural industry were the farmers so well equipped as now to safeguard their interests without the assistance of organized labor. It is admitted that they hold a dominating position in congress, and will be able to put thru most of their program of legislation for the protection and fostering of agriculture. Today they have no more need to sue for the legislative influence of labor than for that of capital. While agriculture has suffered losses greater than any other industry, the farmers are not aware of any movement on the part of labor to help them; on the contrary, they feel that organized labor is using its power selfishly and to the hurt of the community as a whole.

Under all these circumstances, a combination between the farmers and organized labor seems to us about the remotest of possibilities. It is far more likely that if the railroad and miner's unions continue to de-

The Hodge-Podge

Hot air and cold feet is a poor combination.

For the land's sake—grow soy beans. This is what Donald Ball says, so it must be so.

All the ship board vessels are to be named after presidents of the United States, thus depriving Pres. Harding of the honor since he is not yet an "after."

Law and order is especially commendable when enforced.

Brush up the front yard by eliminating the brush.

The woman who has beauty of character does not need to worry if her ears are exposed to the public gaze.

Ashes to ashes,
Dust to dust;
While the optimist splashes
The pessimist busts.

When a fellow reaches the top, he sighs over the good times he left at the bottom.

82 Years Old and As Good as a Youngster

"7 or 8 years ago I was a very sick man. Doctors said catarrh trouble of stomach and bowels, affecting the liver and heart. For more than a year I wanted to die, but could not. Upon the advice of a friend I tried Mayr's Wonderful Remedy, and although 82 years old I now feel as good as a youngster." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. For sale by Druggists everywhere.—Advertisement.

Important to all Women Readers of this Paper.

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.

MANY IDEAS TO LESSEN THE EVILS

Harvard, Princeton and Yale All Differ Over Methods to Keep Their Sports Clean

AGREE IT MUST BE DONE

Harvard Would Eliminate Newspaper Men While Yale Plans to Broadcast Sports by Radio

By HENRY L. FARRELL
(U. P. Staff Correspondent)
New York, April 4.—Yale, Harvard and Princeton—the well known big three, still figure that intercollegiate sport has to be saved. They differ on methods, but they agree that it must be done.

Harvard breaks forth with the brilliant idea that the problem could be solved if plebian newspapermen could be barred from the stadiums at the big games. However, this was passed up when some bright light made it known that several years ago Harvard had offered newspapermen \$100 if they wouldn't write anything about the Yale-Harvard game. They couldn't understand why the newspaperman could turn down \$100 cash. It was also pointed out that troops might be needed at the gates to keep out the scribblers.

Yale hasn't had much to say since the head coach came out and said that "common sense instead of high-brow talk" would cure any evils if the did exist.

Tad Jones stands high at Yale and the bright minds of the campus could hardly engage in a debate with him.

But Roper also pounced with both feet on some of the big notions the Princeton boys put about cleaning up sport for the poor colleges in the south and west.

The agitation, all seems unnecessary and ill-timed. Pennsylvania State, Georgia Tech, Iowa, California and other big universities which have teams that might trim any of the "big three" don't need the pilgrimage of any wise men from the east to show them how to conduct sport.

Government officials have been encouraging all kinds of sports, especially international sport. Major Daly, head football coach at West Point, says that the more games between Europe and the United States, the less chance there will be of big trouble in the coming years.

J. T. McGovern is in England now trying to perfect plans for big British-American sports says he will not be helped when the "big three" is yelping about indefinite things that aren't shown to be existing. The attitude of Yale is particularly inconsistent. Yale like Harvard claimed that two much publicity was the cause of the evils. Yet when means of keeping newspapermen away from the stadium are being discussed and planned another department of Yale comes out and announces that play by play details of the game next fall will be "broadcast" by radio.

Sport Summary

Chicago—R. G. Haas, a sure point getter in the University of Chicago track team has been declared ineligible because of lack of proficiency in physical culture.

New York—Jack Coffey, who has been coaching the Fordham nine left for his new job as manager of the Hartford Eastern league club.

Princeton — Princeton doesn't want to be represented by the wandering star who has made his reputation elsewhere, according to the "Princetonian." The paper scores "tramp athletes" and their "back-door methods."

New York—Close of the Intercollegiate Basketball League's season found Princeton the champion, with Pennsylvania, Dartmouth, Cornell, Columbia and Yale following in the order named. Graves, Penn Center was the best scorer with 147 points.

Chicago—Sixteen teams have been entered in the third annual interscholastic swimming meet which will be held here Thursday. The meet is open to all high schools and academies in the country.

Milwaukee—Pinky Mitchell will meet Pal Moran of New Orleans and Tony Dennis of Milwaukee will mix with Tommy O'Brien of Los Angeles in a fight card here April 7.

Little Rock—Shift in the infield of the New York Yanks is expected. Baker probably will be benched, Ward will replace him at third and McNally will play second.

Jackson, Miss.—Claid Jonnard, Rocky pitcher let Memphis down with one hit in the last four innings and the Giants won, 9 to 2. Frisch is out again with an infected toe.

Little Rock—Brooklyn mauled Mays and O'Doul and trimmed the Yanks 1 to 0. Grimes and Reuther were invincible.

New York—Johnny Buff, bantam weight champion, and Joe Lynch former champion will meet in Madison square garden May 5 for the title.

Dyersburg, Tenn.—The Red Sox turned in their sixth straight victory defeating the Minneapolis Millers, 5 to 2.

Charleston, S. C.—The Braves beat the Washington Senators, 3 to 2.

Chicago—Teams entered in the National Interscholastic basketball tournament which will begin at the University of Chicago tomorrow arrived today. The final round of the tournament will be played Saturday.

Chicago—Johnny Meyers retained his middleweight wrestling title here last night by defeating Ralph Parcaut of Spencer, Ia., after twelve ten minute rounds.

Chicago—Welker Cochrane will be offered a match with Balkline champion Jake Schaffer on May 16, 17, 18, according to announcements by the latter's manager.

OPERATION WOULD BE FATAL

Siamese Twins, Who Died Last Week Were Joined Together at Spine

(By United Press)
Chicago, April 4.—Operation to separate Rosa and Josefa Blazek, Siamese twins would have proven fatal, a secret postmortem conducted here showed.

Dr. J. H. M. Otradavee stated the twins, who died last week were joined together at the spine.

The surgeon said that Frantz Blazek was undoubtedly the son of Rosa and not of both twins.

Testimony of Dr. Otradavee is expected to be introduced in probate court here during settlement of the \$100,000 estate of the twins. Frantz, it was believed will receive \$50,000 of the estate. The other half will go to Frank, brother of the twins.

FLYING START IS ALL CARDINALS ASK

An Even Break on the Pitching Staff and St. Louis is Going to Leave Seven Behind

WELL FIXED IN THE BOX

Manager Rickey Will Start Same Team That Came so Close to The Pennant Last Year

By W. J. McVICKER
(U. P. Staff Correspondent)
Give the St. Louis Cardinals a flying start and an even break with the pitching staff and seven other clubs in the national league are going to be "also rans."

If Rogers Hornsby and Jack Fournier, who reported late at the training camps are in condition, the club out to get away good and the pitchers have shown enough form to indicate that the Cards are fixed as well in the box as the other logical contenders.

Stock and Smith reported so late last spring that the race was started with an improvised team that lost fifteen out of the first twenty games and go so far in the rut that even the spectacular finish was not enough to beat the New York Giants out for the pennant.

Manager Rickey will start the same team that came so close to its first pennant last year. He was greatly peeved at Stock and threatened to trade him during the winter but he has relented and will start him at his old place at third. With Doc Davan at short the peerless Hornsby on second and Fournier on first base the Cards have a hard hitting, good fielding inner defense.

There are only seven good outfielders on the roster: McHenry, Mann, Schultz, Heathcote, Smith Miller and Shotten. They are all 300 hitters and sweet fielders. Its the best bunch in the major leagues.

Dilhoefer will be missed badly behind the bat. Eddie Ainsmith will do most of the catching this season. Will Clemens also working.

Newcomers: Gainsboro, fielder, Earl Adams short stop, Herb Steen pitcher and outfielder and Clyde Barfoot pitcher from Houston. Bill Doak, counted on as a mainstay in the box, has a sore arm and Pertout has been under the weather. Rickey has nothing to smile about if this pair fails him.

Big Jeff Pfeffer, Haines, Walker, Sherdell, Bailey and North are counted on as the rest of the staff with Young Barfoot in the offing.

'SHOOT ON SIGHT' IS ORDER

Chicago Police Go Gunning For Bandits Who Killed Policeman

(By United Press)
Chicago, April 4.—"Shoot on sight," were orders issued by Chief of Police Fitzmorris today concerning the slayers of Policeman Earnest Cassidy and Phillip J. Summers, treasurer of the Royal Building and Loan association.

The two were shot by bandits, five in number, who then snatched a satchel containing \$7,000 and escaped.

The robbery was in full view of hundreds in the business district of South Chicago last night.

AWARD BRIDGE CONTRACTS

Highway Commission Takes Another Step on Their Program

Indianapolis, Ind., April 4.—The state highway commission awarded bids for eighteen bridges to be built in Indiana today.

The contracts will total between \$500,000 and \$600,000, members of the commission said.

This is part of the commission's \$2,290,000 bridge-building program for this year. The plan calls for 117 structures. Bids for the rest will be advertised later.

WOULD EXEMPT OTHERS

Washington, April 4.—Congressional action to give industry and business generally the same exemption from the anti trust laws as Congress recently afforded to farmers was urged by Senator Edge, New Jersey today when he introduced a resolution for a congressional committee to investigate the business situation and report to congress on legislative methods of restoring domestic and foreign trade.

TO ORGANIZE ON THURSDAY

Arlington Baseball Team Will Hold Meeting at Dr. Shauck's Office

Baseball candidates of the Arlington Athletic Club will meet at the office of Dr. A. G. Shauck Tuesday night, April 6. All persons desiring a tryout are urged to attend this meeting.

The Athletic Club has leased new baseball diamonds just east of the new gymnasium in Arlington and have purchased new uniforms for the baseball players. Five new men have made it known that they wish to be connected with the team this year.

FOR SALE

TWO NEW

Fordson Tractors

Complete, with 2 bottom 12 inch plows. Have never been used and are specially priced to close out.

These tractors were traded to original purchasers on horse deals and were later traded to us for International 8-16 tractors with P. & O. 14 inch plows, for the following reasons—

First—They wanted to pull two 14-inch bottoms 8 inches deep and they could not do it with above tractors and knew they could do it with the International 8-16.

SECOND—One man had hilly ground and was afraid it might rear over and kill him.

SOCIETY

Edited By Miss Edna Krammes
Phone 1111

Mr. and Mrs. Orie Huddleson and Miss Sarah Huddleson of Dublin were the dinner guests of Mr. and Mrs. J. F. Ryan Sunday at their home in Orange.

Mr. and Mrs. Fred Knotts entertained with a prettily appointed dinner party Monday evening at their home near Ging, honoring Mrs. May Warne. Covers were laid for fourteen guests. The table decorations were Easter flowers.

Forty neighbors and friends delightfully surprised Mrs. Jesse Retherford Monday evening at her home north of the city, honoring her birthday anniversary. Games, music and dancing furnished the amusements for the evening and dainty refreshments were served.

The Woman's Missionary Society of the Little Flatrock Christian church will meet in the Sunday school room of the church Thursday afternoon, April 6, promptly at 2 p. m. Mrs. Adelaide Defrees will have charge of the program. It is urged that as many of the members as possible be present at this meeting.

The Triangle Club of Fairview enjoyed a very interesting meeting Sunday afternoon at the home of

Miss Alice Peters near Fairview. The subject for discussion was "Benevolences of the Church for the Aged and Children" and interesting papers were prepared on the subject by Miss Cecil Thomas, Miss Mary Louise Darnell and Miss Gleta Reed. The leader of the meeting was Miss Ruth Stafford. The guests enjoyed a social hour at the close of the program during which dainty refreshments were served. The next meeting will be held at the home of Miss Mary Louise Darnell east of Falmouth, the second Sunday in May. The leader will be Miss Alice Peters.

Mrs. Lowell Green was hostess to the members of the Monday Circle Monday afternoon at her home in North Perkins street. The subject for discussion at this meeting was "In Dealing With Literature as with Religion, We are Dealing with a Power." Mrs. Ione Churchill prepared a very instructive paper on "How Kipling Put India On the Literary Map." Two interesting book reviews of Kipling were given by Mrs. Harry Kramer. The first was "Without Benefit of Clergy" and the second, "Error in the Fourth Dimension." The next meeting of the club will be held in two weeks at the Elks club rooms with Mrs. J. B. Kinsinger as hostess. Mrs. Demarchus Brown will give a lecture at this time on "Modern English Novelists."

The regular monthly meeting of the Woman's Council was held Monday evening in the Callaghan store in East Second street. Three new members were taken into the organization. They included Mrs. Scott Hosier, representing the American Literary Society, and Mrs. Inez Saunders and Mrs. Clyde Nebro, representing the Missionary Society and Ladies Aid Society of the First Baptist church.

The visiting nurse, Miss Louise Fort, gave her monthly report. During the month of March she gave 207 personal aids and attentions to thirty-six patients, and made 204 physical examinations of children in the city schools.

The council endorsed Mayor Walter Thomas' "Clean-up" week and pledged their assistance in making the campaign successful. Plans were completed for their aid in this special work.

Easter Invariably Means a New Bonnet to the Average Woman

BY HEDDA HOYT
(Written for the United Press)

New York, April 4.—A groundhog has a chance to pick his weather. A woman never. Weather it be raining cats and dogs on Easter Sunday, perched on every woman's head, will be her Easter bonnet offering.

From Fifth Avenue, New York, to Main street, in 48 states, there will be one long procession of bonnets as varied in color as dyed Easter eggs. Whatever Easter Sunday may mean to the theologian or to the philosopher, to a woman it means—a new hat.

Although hats are far less expensive this year than they have been for some time back, there is no reason why the Colonel's lady and Julie O'Grady should appear in the same head-gear, for there seem to be no two models exactly alike either as to shape or trimming.

Turbans

The turban will undoubtedly be the most popular model in the Easter Parade, as many of the smartly gowned women prefer a close fitting hat for the early season wear. They are usually made in black highly lustered fabric, which is wrapped in thick rolls about a medium sized frame in Hindu effect. They are trimmed in various ways, of which the small rhinestone pin placed at the center front is the most frequent. The earring idea is carried out in some instances, where long pendants are attached to the sides of the hat. Then there are the sprays of Paradise and aigrettes which fall to one side. Hats of this turban type are generally made in black, although there are a few jade greens and Roman striped silks used. One very attractive turban made in the Roman striped effect has colorings of blue, jade, yellow and black swathed about the head with a huge green scarab placed directly over the eyes.

It is futile to try to describe the many effects of the turbans but their general aim is to look like the head gear of the Hindu or the fez of the Turk. To achieve the best effect the turban must be worn low over the eyes giving one a mysterious Oriental appearance and there are some fetching little harem veils made of a transparent mesh which make one look—Oh! La! La!

Poke Bonnets

The poke hat will not be poking in the rear of the Easter procession if the smart hat houses have their way. Perhaps more can be done with a hat of this sort than any other model, as so much depends upon its trimming and facing. They may be either small and close fitting or quite wide with glazed fruits of flowers piled high across the front. A pretty dressy model is made of black horse-hair braid trimmed with black grapes and shiny leaves. Its back rim is cut very short as are most of the poke effects. Sometimes there is no back brim at all, which is particularly attractive on the bobbed hair miss, for it permits her short locks to curl cunningly upwards in back. Since these joke brims tend to cast a shadow over the face it is well to have them faced in soft color. A black shape of Timbo straw is lovely faced in the faintest of shell pink with waxed pink camellias placed at the sides, their stems and foliage drooping slightly over the brim.

Large Hats

The very large hat adds a new note to the spring millinery with its brim slightly drooping and softened with a maline flange. Nothing can be prettier for afternoon or dress wear than a hat of this type. There is some doubt as to whether these large hats will make their appearance as early as Easter, as they are essentially a summer hat. A wide leghorn has its wired brim edged with a fold of narrow blue ribbon and its crown developed in the shade of blue silk faille. Its sole trimming is a

wide sash of sorrel velvet swathed about the crown and tied in a loose bow at one side. Leghorns, by the way, from the body of some of this season's smartest hats. There is one model trimmed in yellow chiffon which is peccot in petals that are placed in layers about the brim and fall over the edge giving a soft effect to the face. The crown is left in the plain leghorn while the facing is of yellow ribbon fall over the left shoulder in cascade fashion. This makes a bewitching hat for the Easter bride's maid. A novel way of trimming the large hat is to place flat flowers in solid mass effect on the under brim.

Paris Tamoshanter

Paris is responsible for the fantastic tamoshanter, called the "crazy quilt". It is made of various colors and shapes of silk put together with yarn of feather-stitching. It is exactly like Grandma's old patch quilt work, but when a vari-colored tassel is added it really acts as a smart finish for the unusual looking costume. The Parisian price tag which it carries will bar it from becoming common.

Hat Colors

In spite of the preponderance of colors used this spring, black will lead during the early season. Red is being used regardless of one's coloring and is quite attractive with the all white sport suit, especially since there are such adorable white sport shoes with red trimmings. Red, however, is not credited entirely to sport wear. A very popular debutante who effects pale make-up with red lips, appeared on the Avenue recently in a grey costume suit which was worn with a grey silk turban trimmed with a huge center pendant of lip-stick red.

Periwinkle is a popular hat shade just now, though there is danger of its becoming very common. Dandelion yellow is good but the tendency of the well dressed woman is to let others carry the real vivid hues. She prefers the new colors in the softer, more subdued tones. Black and white is waning in popularity daily and no longer is it associated with mourning wear. The white is introduced by the way of trimming either as piping or as clusters of waxed flowers. Dark women find this black and white effect flattering.

Trimmings

Odd feather fantasies are leading over the flowers as a trimming for the Easter hat. Where flowers are used they are in the buttoniere clusters placed about the flat brims or else in the solid mass effect on the off-the-face hat. Tulips in shades of red and purple are very new and add a "Springiness" to the Easter Bonnet.

They are placed in nosegay fashion about the brim. Another nosegay trimming is made of rosettes of dyed narrow lace. The all lace hats will play their part in the Easter evening show as will malines in black and blown. Just now wide ribbons bows are being used on many of the all black models. Often a plain black hat is turned into a charming creation by a huge loosely tied bow placed at exactly the right angle with long ends falling to the waistline.

For the women who intend to spend her Easter at Atlantic City or Palm Beach, the sport hat will enact the Easter bonnet role. Quite the smartest of these are the small roll brim leghorn sailors with the usual ribbon hat band. The debutantes prefer to wear theirs rolled up in front and down in back. Felts are still going well for resort wear and best suit the tweed sport costumes. The new stripped awaning effects made of cloth material have a certain amount of distinction.

If There's Anything In The House that Needs Thorough Laundering Now It's The Lace Curtain

Exposed to the warm air during the long indoor months, its very nature has made it the catch-all for everything from fine particles of dirt to invisible germs.

That's why April has been designated as Curtain Month and is being observed by launderers throughout the United States.

How about your curtains? Do you dread the job? Let us relieve you of it.

By our modern system you can have them washed gently, dried to their exact measure and returned soft, filmy and as attractive as when new.

Of course, we launder your curtains any time, but we especially want to demonstrate this feature of our service during

April Curtain Month.

A word from you by phone and our representative will call.

BETTER THAN CALOMEL

Thousands Have Discovered Dr. Edwards' Olive Tablets are a Harmless Substitute

Dr. Edwards' Olive Tablets—the substitute for calomel—are a mild but sure laxative, and their effect on the liver is almost instantaneous. These little olive-colored tablets are the result of Dr. Edwards' determination not to treat liver and bowel complaints with calomel.

The pleasant little tablets do the good that calomel does, but have no bad after effects. They don't injure the teeth like strong liquids or calomel. They take hold of the trouble and quickly correct it. Why cure the liver at the expense of the teeth? Calomel sometimes plays havoc with the gums. So do strong liquids. It is best not to take calomel. Let Dr. Edwards' Olive Tablets take its place.

Headaches, "dullness" and that lazy feeling come from constipation and a disordered liver. Take Dr. Edwards' Olive Tablets when you feel "lousy" and "heavy." They "clear" clouded brain and "perk up" the spirits. 15c and 30c.

WARNING! Say "Bayer" when you buy Aspirin.

Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians over 22 years and proved safe by millions for

Mrs. Claude Collins and Miss Edna Ball of Marion spent the week-end with Mr. and Mrs. Fred McCorkle.

Mrs. H. C. Ball has left for her home in Maysville, Ky.

Abundant vitamin now contained in small yeast tablet

Yeast Foam Tablets are from 4 to 5 times as concentrated as the ordinary baking yeast. The necessary vitamin potency, therefore, is contained in a much smaller dose.

"CONGRATULATE YOU," writes a well-known physician, "on your new therapeutic yeast. I am sure it will be welcomed by the medical profession and by thousands of people who disliked eating such large quantities of fermentative baking yeast—as well as by countless others who sought in vain for any appreciable tonic benefits in many drug-laden and untested 'vitamin' preparations."

This yeast supplies what modern foods lack

Yeast Foam Tablets correct a serious deficiency in present day diet by supplying the essential vitamin which is found in many raw foods but which is completely eliminated, in many cases, by the time these same foods reach our table.

This vitamin is necessary to digestion and the conversion of foods into healthy tissue and bodily vigor.

Without sufficient quantity of vitamin your body goes sick and you are only

aware of it in such signs as loss of appetite, failing strength and endurance, nervousness, sallow skin and other definite signals of vitamin starvation.

Yeast richest source of vitamin

In the yeast plant is an abundant store of this indispensable vitamin and in Yeast Foam Tablets there is nothing but pure whole yeast (*saccharomyces cerevisiae*)—millions of these tiny plants being concentrated in each tablet.

The vitamin potency of this new yeast is therefore high and, consequently, its tonic and reconstructive properties are most unusual.

Yeast Foam Tablets are made by the world's largest manufacturers of dry yeast, the makers for 45 years of the famous baking yeasts, Yeast Foam and Magic Yeast.

They are the result of two years of experiment conducted under the guidance of some of the country's leading medical scientists. Recommended by physicians and sold by druggists everywhere.

Northwestern Yeast Co., Chicago

The Home Garden

The Man With The Hoe Says—

Do not waste any wood ashes from the grate. Strew them over the garden. They are rich in potash fertilizer. It will leach into the ground, but unlike nitrates, will remain there in suspension and the plants can get the full benefit. You are throwing away money when you throw away wood ashes. They are especially valuable for daffodil and tulip beds.

Sawdust is not a good fertilizer and should not be spaded into the garden until it has rotted so that it almost disintegrates. It is a favorite breeding place for certain kinds of insects. Burn it and use the ashes.

Turnip tops make almost as good greens as mustard. Sow the early turnips thickly and then thin out for greens.

Give seedling tomatoes air whenever it is possible to make them stocky. No plant goes spindling faster than the tomato. Open the window a little way on any day when the temperature is above freezing but do not expose to cold winds. Fresh air whenever possible goes a long way toward making fine, strong tomato plants in the seed boxes and frames.

Transplant tomatoes twice if it can be arranged. This checks the

growth and prevents their growing leggy. They are much sturdier and stockier when twice transplanted before going into permanent quarters.

Soaking spinach seed in hot water for several hours before planting is an old gardener's trick. It speeds up germination.

Eggplant seed must not be kept too wet when it is germinating. It also should not be allowed to get cold. They do not require as much moisture in their early stages as other vegetables.

Swiss chard will give a much earlier crop if a few seeds are started in early March and transplanted. It can be handled readily and it is never so tender and appetizing as in the early spring. Chard should always be cut when young, as allowing the leaves to become mature checks the production.

Beets are one of the most healthful of vegetables, containing more elements which the human system needs than almost any other.

Give the asparagus bed a good dressing of manure. It will hasten the appearance of the "grass" and make it more tender. The custom of salting the bed may be omitted. It does not produce any noticeable results one way or the other.

Celery seed for successful germination, must never be allowed to get on the dry side. It requires more moisture to germinate successfully than many other seeds. Don't wash out the seeds or let the seed box become waterlogged, however.

Half egg shells make good seed pots in which to start cucumbers.

Plant a few kohlrabi now for an early crop, but remember it must be transplanted carefully and usually does better when allowed to remain where it is sown.

Most gardens need lots of lime to start the season with. Water-slaked or hydrated lime is good for quick effect, but ground limestone is more lasting. The latter may be applied at the rate of two tons to the acre. It is needed badly on lawns where blue grass is grown.

We are now prepared to do your car washing in first class shape. Joe Clark.

The Winning Pair: PREST-O-LITE Trademark and PREST-O-LITE Price

When you consider that you can get a Prest-O-Lite Battery at \$19.90 (trade-in price) for popular makes of light cars, —and link it up with the Prest-O-Lite trademark, —and remember that it contains the famous Prest-O-Plates,

—and is guaranteed by the regular Prest-O-Lite guaranty; a generous, definite obligation, plus a spirit that says the car owner must be pleased.

—you are sure to realize that the Prest-O-Lite Battery is the best buy on the market.

There are correspondingly low prices for other types of Prest-O-Lite Batteries.

How is your battery acting? If it is not working eagerly and vigorously, drive around and let our specialists prescribe the right treatment for it. Our business is to prolong the life of all batteries. We never say you need a new battery until you do.

We are part of the Prest-O-Lite Service, the oldest organized service to motorists.

MOVING PICTURE DIRECTORY

ACTOR SEES NEED FOR BETTER FILMS

Hobart Bosworth Says Public Has
Demanded Rotten Films Be
cause Box Office Shows Results

SEX QUESTIONS APPEAL

Says Majority of Film Folk Are
Decent, Ordinary People, Who
Live Quiet Lives

By ROBERT A. DONALDSON
(U. P. Staff Correspondent)
San Francisco, April 4.—When
the public wants decent motion pic-
tures, it will get them, and not until
then.

That is the opinion of Hobart
Bosworth, veteran actor and pro-
ducer.

"The public thinks the motion pic-
ture industry is rotten," said Bos-
worth. "Well the motion picture in-
dustry knows the public is rotten."

"It is a disagreeable truth that
the reason that so many films are be-
ing made with the sex appeal is be-
cause the public packs the theatres
when such films are shown."

"As long as this is true, the public
is going to get that kind of films."

"Personally, I believe that the pub-
lic is just beginning to adopt a
thumbs down attitude on this type of
film. It is a good thing. It is much
better to have the public finally make
up its mind to do this, than to have
it done by some outside influence."

"We need better films. They are the
great source of pleasure and enjoy-
ment, of clean amusement and edu-
cation in America today. Their fu-
ture will be along the same lines as
the development of great literature
or drama."

Bosworth recently left Hollywood,
and removed to the new Pacific stud-
ios film colony at San Mateo, fifteen
miles from San Francisco.

"I left Hollywood essentially be-
cause Southern California is worked
out as far as locations go. In this
district one has much greater choice
in the selection of locations."

Bosworth believes that the "break-
ing up" of the Hollywood colony
would be mere foolishness.

The reason the Hollywood colony
has received such unfavorable pub-
licity is because of the prominence
of the film stars who are for the ma-
jority centered there, and because
of a certain small undesirable el-
ement which has recently been in the
limelight.

"This undesirable element is not
confined to the film colony. There is
the same sort of element in society.
Hence society scandals. But in most
cases the people concerned are not
important enough to warrant any
notoriety."

"But, as in all other walks of life
this element is small in the film col-
ony, and you may be assured that
the big men of the film world are do-
ing their best to uproot it and put it
out of business."

"The majority of film folk are de-
cent ordinary people, who lead quiet
lives. Many of them are married and
have their homes and kiddies. And
this class, which is the large major-
ity, is more concerned about the
homefires than any other class of
people in American life—because
they find it harder to obtain real re-
tirement."

"Take that into consideration
when you discuss Hollywood and the
thousands of people in the motion
picture industry upon whom you are
throwing mud because of the notori-
ety which has come to a small hand-
ful."

Last Time For "Love Expert"

"When you are in love with a
man, on taking his hand, you will
blush, the pulse will beat faster and
your heart will palpitate."

This is the infallible test of Babs,
the part played by Constance Tal-
madge in "The Love Expert," the
First National picture which will be
at the Princess for the last time to-
night.

She tries it on her father's busi-
ness partner. It fails to register. She
tries it on a college professor. Again
the test is negative. She experi-
ments with a handsome young fel-
low, the fiancé of her aunt. Well,
the result is very positive, and
that's when some strange things be-
gan to happen.

"The Swamp" at the Mystic

Sessue Hayakawa, Bessie Love
and the clever boy actor, Frankie
Lee, all appear in "The Swamp,"

written by Mr. Hayakawa for him-
self and distributed by R-C Pictures
corporation. It is being screened at
the Mystic theatre for the last time
today.

In "The Swamp" Hayakawa, is
seen as a chinese vegetable peddler,
who sells his wares from a cart in
the crowded streets of New York's
tenement district. A quiet, shy boy,
his neighbors know little of him and
his dreams he confides to his only
companion, a horse. That is until he
meets "Buster" played by Frankie
Lee. "Buster" is a tiny human sun-
beam. Through him the chinese boy
stumbles on a romance which is one
of the most beautiful and exquisite
love stories ever recorded by a mo-
tion picture camera.

Realizing the importance of having
the best cast obtainable surrounding
him, Hayakawa sent a copy of the
play to Miss Bessie Love and asked

her if she could play the leading fem-
inine role, notwithstanding the fact
that Miss Love is a star in her own
right and has her own production
company.

Miss Love read the script and was
so deeply impressed with the story
that she immediately consented to
play the part, which is the first time
in motion picture circles that the
star of one production company con-

sented to play opposite and sup-
port another star.

WEDNESDAY AND THURSDAY

Priscilla Dean in "WILD HONEY"

Come and see the world's greatest dramatic screen artist in her
biggest and most powerful thriller. You'll never forget the flood
scene as long as you live.

"PATHE NEWS"

Wednesday PRINCESS Thursday

**You'll Never Forget
This Scene as Long
as You Live**

See the world's greatest emotional actress in
this powerful, dramatic production — a picture
that will bring vividly before your eyes the explo-
sion of the great dam — the terrible flood rushing
down on an unsuspecting South African valley,
sweeping all before it.

If the great log jam in "Conflict" took your
breath away — then the flood in "Wild Honey"
will petrify you; for here's a scene you'll never
forget as long as you live! Don't miss it!

CHURCH CENSUS IN A LARGE INCREASE

Churches in the U. S. Gained Over Half Million During The Year Just Closed

43,523,206 ARE ACCOUNTED FOR

Most of the Denominations Shared in the Growth With Methodists Showing Biggest Gain

(By United Press)
New York, April 4.—The church membership of the United Press showed an increase of 761,727 in 1921, according to complete official figures to be printed in the Christian Herald, April 1. This census of the religious life of the United States was made by the Rev. H. K. Carroll. The gain is an excess over that of 667,007 reported in 1920. The Christian Herald will say:

"Most of the denominations share in the increase. The Methodist group appears to have grown to the remarkable extent of nearly 300,000. Nearly a third of this, however, is credited to the Colored Methodist Episcopal church. The Presbyterian group advances by 62,649. It should be noted that the Welsh Calvinistic Church disappears from the list of separate bodies this year, having been merged in 1921 with the Northern Church.

"In the Baptist group the three large Baptist bodies, which are growing rapidly, are represented by the returns for 1920, for the reason that their statistical year is the calendar year and no figures for 1921 are available. The Free Baptist body no longer appears as a separate organization. It has been in the process of merging with the Northern Baptist Convention for several years and has now practically disappeared. If Baptist increases for 1921 were included the total of gains in 1921 would almost certainly reach 850,000.

"The Salvation Army appears with a remarkable increase, 59,247. The net gain of the Lutheran group is about 18,000. The gain of the Roman Catholic church appears much smaller than usual. In 1920, it was 127,579, this year it is under 50,000, the smallest figure reported in many years. The Disciples of Christ registered an advance of nearly 24,000.

"The 'Later-Day Saints, Utah branch, gained 45,000 and the Reorganized branch 2,496. The increase of the Protestant Episcopal Church is 5,768, which is rather under its usual gain.

The United Brethren in Christ makes an advance of 13,245 and the Evangelical Association and United Evangelical Church of 4,617."

It will be noted that no figures are given for the Church of Christ Scientist. The 1921 membership by denomination in the census follows:

Denominations	Communicants
Adventists	136,579
Assemblies of God	10,000
Baptists	7,825,598
Brethren (Dunkard)	137,142
Brethren (Plymouth)	13,244
Brethren (River)	5,962
Buddhist Jap. Temples	5,639
Catholic Apostolic	2,768
Catholic Eastern Orthodox	645,444
Catholic, Western	15,342,171
Christadelphians	3,890
Christian, American Convention	97,084
Christian Union	16,800
Church of Christ Scientist	
Church of God and Saints of Christ	3,311
Church of God (Winebrenner)	28,672
Churches of God, Gen. Assembly	18,248
Churches of the Living God (Colored)	11,000
Churches of the New Jerusalem	9,400
Communitistic Societies	1,901
Congregational Churches	819,225
Disciples of Christ	1,519,715
Evangelical	213,664
Evangelistic Assoc.	13,933
Evangelical Protestant	17,992
Evangelical Synod	274,860

Grand Total in 1920 42,761,479

INFLUENZA KILLS HOGS

Warsaw, Ind., April 4.—Influenza has killed one hundred and twenty-three hogs on farms in Kosciusko, Cass and Logan counties in the last two days, according to Dr. William A. Mabie, veterinarian here today. The farm heaviest hit was that of Orlando Meredith, livestock raiser of state wide prominence who lost 93. Dr. Mabie said the disease was contracted from animals shipped from the south.

MOTHERS AND DAUGHTERS

Read This Letter from Mrs. W. S. Hughes

Greenville, Del.—"I was under the impression that my eldest daughter had some internal trouble as ever since the first time her sickness appeared she had to go to bed and even had to quit school once for a week. I always take Lydia E. Pinkham's Vegetable Compound myself so I gave it to her and she has received great benefit from it. You can use this letter for a testimonial if you wish, as I cannot say too much about what your medicine has done for me and for my daughter."—Mrs. Wm. S. HUGHES, Greenville, Delaware.

Mothers and oftentimes grandmothers have taken and have learned the value of Lydia E. Pinkham's Vegetable Compound. So they recommend the medicine to others. The best test of any medicine is what it has done for others. For nearly fifty years we have published letters from mothers, daughters, and women, young and old, recommending the Vegetable Compound. They know what it did for them and are glad to tell others. In your own neighborhood are women who know of its great value.

Mothers—daughters, why not try it?

WANTED

Everyone interested in gilts to attend my sale

Saturday, April 8th

At Thompson's Sale Barn, Rushville, at One O'clock at which time I will sell

HOOSIER STATE IS MINATURE OF U. S.

Indiana Is Looked Upon by Trans-continental Motorists as Playground of Nation

A WIDE RANGE OF SCENERY

Recent Survey Showed 92 Points of Interest Ranging From State Parks to Sand Dunes

(By United Press)
Indianapolis, Ind., April 4.—Indiana is rapidly becoming the playground of the nation.

This statement was made today by Richard Lieber, director of the state department of conservation who said that in the past two years the Hoosier commonwealth has come to be looked upon by a large part of the United States where trans-continental motorists and seekers of out door recreation find their ideals fulfilled.

Lieber explained that Indiana is a miniature of the United States. In the north is industry; in the south agriculture, and all over the state there is a wide range of scenery, much of a primitive and historic nature.

He estimated that tourists spent in this state last year in excess of \$20,000,000.

Indiana roads are noticeably better than the state roads of many states spending larger sums for such public improvements, Lieber said, and took the position that good roads well maintained was one of the drawing cards in this state for tourists.

The Hoosier state possesses four parks under jurisdiction of the conservation department.

The state is rich in primitive, senic and historic spots. A survey completed recently by the conservation department showed 92 points of interest ranging from state parks to sand dunes.

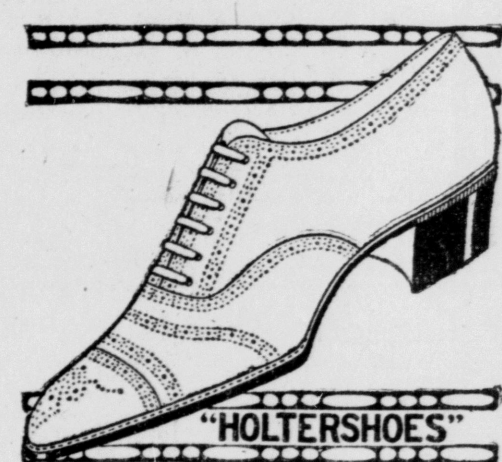

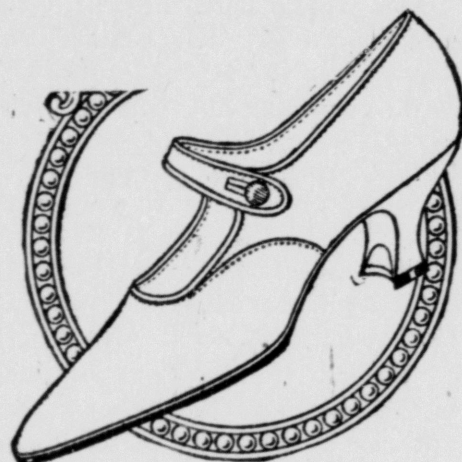

Out of an area of 22,000,000 acres Indiana has 440 square miles under water. This water, if in one body would represent a lake 110 miles long and four miles wide.

Last year the department's report showed more quail in Indiana than at any one time in the past twenty years.

For first class car washing take your car to Joe Clark. 1713

A Good Fence Post At Reasonable Price

38c buys a ½ round 8 ft. white cedar post with an average face 6 inches wide. These posts are straight and set so that a fence can be stapled to them easily.

They have a reasonably long life. And while white cedar is not a hard timber, no trouble should be experienced holding the fence to the post if a long staple 1½ inches long is used.

The Good

MAXWELL

Geo. C. Alexander & Co.

GEO. C. ALEXANDER

V. A. MAFFETT

A Loyal Son Was He

Fort Wayne, Ind., April 4.—Cops raided the home of Andrew Rudowski here.

They found a barrel of mash merrily sizzling in preparation for distilling but could find no still. After a careful search, however, they found a five gallon jug full of moonshine hidden in a chicken coop.

The officers took this into the house as evidence.

As they were leaving with their prize the jug which was carried by one of the officers was suddenly and mysteriously shattered.

One of the policemen turned on a flashlight which revealed Freddie Rudowski's dutiful eleven year old son—in a corner clinching a man-sized hammer, and who heroically admitted it was his own idea.

Rudowski is out on \$300 bond for one of the cops safely delivered a bottle of evidence which they later found in the chicken coop.

ANNUAL MEETING

The annual meeting of the Stockholders of the Rushville Natural Gas Company will be held in their office in Rushville, Ind., on Monday, April 24, 1922, at 2 o'clock, p. m. for the election of six (6) directors to serve for one year from that date; and for such other business as may properly come before them at that time. THEO. H. REED, Mar. 28, Apr. 4-11. Sec'y.

When You Are All Tired Out

You don't want to get up in the morning. You have an irresistible desire to curl up in the bed clothes and stay there. But you can't, so you stretch, and as Grace Margaret Gould, fashion writer for the Woman's Home Companion says "how the nerves of your spine are sending out calls for rest, and how each vertebrae does ache in its own special way."

It may be spring fever. It may be rundown condition. The natural relief is to get chiropractic spinal adjustments. They will bring back normal freedom of nerve lines and healthful energy and ambition will follow as a matter of course.

Chiropractic spinal adjustments are restoring conditions of health on diseases of the eyes, ears, nose, throat, lungs, heart, stomach, pancreas, kidneys, liver and lower organs of the body.
